- 36- There is a significant difference between the two formulations: (1) "translation shapes the formation of cultural identity" and (2) "translation reflects the formation of cultural identity".
 - The first is an explanatory, interpretive hypothesis, which suggests that translation is a condition of cultural identity formation.
 - 2) The first is an explanatory, cause-and-effect hypothesis, which suggests that translation is a condition of cultural identity formation.
 - 3) The second formulation is a descriptive, interpretive hypothesis: translation can be interpreted as reflecting cultural identity formation.
 - 4) The second formulation is an interpretive, cause-and-effect hypothesis: translation can be interpreted as reflecting cultural identity formation.
- - 1) translation archaeology, historical criticism, and historical explanation.
 - 2) historical criticism, translation archaeology, and humanizing translation history.
 - 3) historical explanation, historical criticism, and humanizing translation history.
 - 4) translation archaeology, humanizing translation history, and historical explanation.
- 38- Why is the use of the test of normality NOT recommend by some statisticians?
 - 1) The test tends to have low power for samples larger than 50.
 - 2) For small samples, the test tends to reject the null hypothesis too often.
 - 3) If the calculated p-value is greater than .05, then there is not enough evidence to reject the null hypothesis of normality.
 - 4) The test fails to detect non-normality, even if the distribution truly is non-normal.
- 39- Which of the following is NOT among the three sources that contribute to the variability that leads to outliers in statistical data?
 - 1) sample error

2) execution error

3) inherent variability

- 4) measurement error
- 40- What is meant by independent designs in experimental research?
 - 1) Participants are measured under multiple conditions.
 - 2) Participants take part in only one condition of the study.
 - 3) Participants take part in at least two conditions of the study.
 - 4) Participants are unnecessarily burdened with multiple treatments.
- 41- Which of the following indicates the difference between reception and response in research on translation audience?
 - 1) Reception both overlaps and is synonymous with response.
 - 2) Producing an interpretation of a novel represents a particular reception of that text.
 - 3) A situation where response enters the discussion is when one writes about the history of readers' reactions toward a given text.
 - 4) Reception concerns a word with more general connotations, as seen in its recent application in communication and audience studies.
- 42- When the researcher examines context and expertise and the impact which these had on a variable related to the participants, which type of research design is involved?
 - 1) Matched pairs

2) Multi-factorial

3) Repeated measures

4) Ex post facto design

43-	When the evaluators in a stud	dy became more 'lenient' towards poor quality machine			
	translation output as they prog	ressed through the texts, this is called			
	1) Maturation	2) Regression			
	3) Sensitization	4) Hawthorne effect			
44-	In which of the following research situations, the issue of emotional detachment of the				
	researcher is matter of concern	1?			
	1) ethnography	2) true experiment			
	3) in-depth interview	4) Think Aloud Protocol technique			
45-	Which of the following refers to one of the main areas of criticism against quantitative				
	research paradigm?				
	1) Overgeneralization	2) Contextualization			
	3) Corroboration	4) Reductionism			
46- Hardwick believes that the translator of ancient texts sl		nslator of ancient texts should			
	1) encourage translators to study the relation between classic and modern literature				
	2) go beyond the text to articulate the cultural framework which surrounds the text				
	3) consider cultural geography in translation of classic works of literature				
		of translators and their role in the synchrony and diachrony			
47-	In the later stages of Toury's	(1985, 1990) thinking, when the notion of shift gradually			
	became less central, and additi	onal unit of comparison was introduced:			
	 the coupled concepts of acc 	eptable + adequate translation			
	2) the coupled pair of source culture + target culture				
	3) the coupled pair of original writing + translation				
	4) the coupled pair of problem + solution				
		ed for, according to Berman.			
	1) invasive aggression on the part of the translator				
	2) deforming strategies in liter				
	3) ethnocentric translations particular present	which are read and appreciated by the translator's			
	4) ethics of centrifugal translat	tion, which allows foreignness to remain visible			
49-	Cronin assigns a perceptual as	pect to globalization, by which he refers to			
	1) a global identity which in interdependence of the peop	iplies an ecological awareness of the vulnerability and			
	governance	onal mobilization against institutional and supra-national			

- 3) an understanding of the reticular economy which heavily relies on informants and telecommunications networks
- 4) an image of the unified market which promotes product branding and consumer preferences
- 50- According to Pym (1998), translation history should focus on ------
 - 1) translators rather than texts
- 2) texts rather than translators
- 3) both texts and translators
- 4) texts and social contexts
- 51- Which of the following is NOT a sub-competence in PACTE model?
 - 1) Aptitude

2) Strategic

3) Extra-linguistic

4) Psycho-physiological

صفحه ٧

52- Which of the following is NOT true about the epistemological shortcomings in translation history?

- 1) Archeological accumulation of data that responds to no explicitly formulated problem.
- 2) Willingness to see translations as possible agents rather than expressions of historical change.
- 3) Dependence on anecdotal evidence.
- 4) Arbitrary periodization.

53- Computational aspects of localization include all but -----

- 1) Programming languages
- 2) Graphic user interface

3) Online help

4) Diacritics

54- Which of the following type of relationship can exist between sound, pictures and verbal content in audiovisual products according to Gambier?

- 1) Demarcating, coherence, signification 2) Contradiction, performance, criticism
- 3) Redundancy, complimentarity, distance 4) Autonomy, explicitation, signification

55- What is the relation between theory and practice in TS as defined by Arrojo?

- 1) Practice leads to theory which in turn inspires practice.
- 2) Both translating and the production of theory are theoretical because they are always the outcome of a certain viewpoint.
- 3) Theory is goal-oriented, whereas practice is the use of strategies which may come from different approaches.
- 4) The act of translating is practice, but theory of translation is an abstract phenomenon which may or may not detect regularities in a specific translation.

56- Which of the following set forms Kiraly's psycholinguistic model?

- 1) Descriptive use of mental representations, optimal interpretive effort, cognitive environment.
- 2) Decision-making, identifying translation problems, choice of solution.
- 3) Long-term memory, declarative knowledge, procedural knowledge.
- 4) Information sources, the intuitive workspace, the controlled processing centre.

57- Which of the following shows Pochhacker's understanding of interpreting studies research methodologies from past to present?

- 1) The methods are now more specific according to modes of interpreting as interlingual, intralingual and semiotic.
- 2) They used to focus on experimental methods for Indo-European languages. Whereas the focus is now on all types of research and on all language pairs.
- 3) They use corpus linguistics now and web-based surveys which did not exist before.
- 4) They have moved from cognitive towards social sciences and from quantitative towards qualitative methods.

58- Faucett believes that in film translation into English

- 1) language and culture are normally domesticated
- 2) language is domesticated, but scenes supplement foreignization of linguistic and cultural elements
- 3) language is translated literally and this is supported by the cultural atmosphere of the film
- 4) cultural elements are left untranslated, whereas linguistic elements are naturilized

68- In the discussion of inverse translation competence, which of the following subcompetencies is NOT related to 'contrastive discourse competence'?

- 1) Knowledge of differences in textual coherence and cohesion between the SL and the TL.
- 2) Knowledge of text type and genre differences between the SL and the TL, plus awareness of changing genres and inter-textual hijacking in both languages.
- 3) Awareness of the relationship between context and register (field, mode and tenor) and how the priorities and restrictions of each translation situations depend on this.
- 4) Knowledge of text type and genre differences between the SL and the TL and how semantic fields and lexical sets do not always coincide, plus awareness of the limitations of dictionaries and how to solve polysemy from textual context.

69- Which statement is true about translation assessment?

- 1) There is a lack of systematic criteria that can be used universally to assess translations.
- 2) Valid translation assessment criteria defy culture-related norms and are nowadays practiced widely.
- 3) Validity is allowed to be overlooked in student translation assessment as long as reliability evidence is clearly established.
- 4) Translation assessment has currently evolved past text analysis and is focused on sociological aspects of translation practice.

70- Which of the following is NOT true about House's model of translation assessment?

- 1) Dimensional errors were referred to as overtly erroneous errors.
- 2) The model is an eclectic one and is mainly based on a pragmatic theory.
- 3) The model provides an analysis of the linguistic discoursal particularities of SL and TL.
- 4) The model is based on the notions developed in the framework of the Prague School of language and linguistics.

71- Complete the following statement:

Rubrics can be used for scoring translations as they can ------.

- 1) allow for a more atomistic grading of the translation.
- 2) help control and understand the cognitive features of the translation.
- 3) contain one of the main sub-components that constitute the construct.
- 4) provide descriptive statements of behaviors of candidates in a particular sub-component.

72- According to American Translators Association (ATA), translation competence consists of ------.

- 1) organizational competence and grammatical competence
- 2) comprehension of the source-language text and writing in the target language
- 3) pragmatic competence and organizational competence
- 4) comprehension of the source-language text and grammatical competence

73- Translation skill in Angelelli's model of translation ability is related to ------

- 1) a masterful ability to address the TL audience
- 2) the ability to organize translation into sections and paragraphs in a consistent way
- 3) creative solutions to translation problems and skillful use of resource materials
- 4) the ability that reflects a detailed understanding of the major and minor themes of the ST

74- The NAATI criteria seem to focus too much on one aspect of meaning which is ------

- 1) natural
- 2) textual
- 3) experiential
- 4) interpersonal
